How to apply
Wall Graphics

Syba
SIGNS

You will need:

- Masking tape
- Squeegee/straight edged tool
- Tape measure
- Two people

Application steps:

1 Clean wall and hands and ensure they are dry before commencing application. Position wall graphic and tape corners with small pieces of masking tape.

2 Check panel is straight by measuring to a known straight edge.

3 Apply masking tape along the top edge of the panel.

4 Gently roll the panel from the bottom up to the tape at the top. The tape will act as a hinge. Lift until you can peel the backing paper away from the sticker.

5 Continue to peel the paper away from the sticker. At the same time, gently smooth the sticker onto the wall with the squeegee / straight edge.

6 When the paper has been completely removed and the panel is on the wall smooth over the graphic again from top to bottom.

7 Peel off the masking tape.

8 The adhesive is removable and able to be repositioned. Keep the backing paper for storage of the wall graphic when not in use.
