

How to apply Printed vinyl signs

Application steps:

- 1** Clean the selected surface and ensure it is dry before commencing application.
- 2** Mark the position for the sign with masking tape or marker that can be removed once the sign is applied.
- 3** Remove the backing paper from the vinyl sign. Be careful not to let the sign stick to itself.
- 4** Line the sign up by eye against your marks.
- 5** Carefully lower the sign down onto the surface, try not to trap any air under the vinyl sign.
- 6** Working from the centre out to the nearest edge, smooth out any bubbles with a damp cloth and your fingers.
- 7** Finish by firmly smoothing over the sticker with a damp cloth.

Application Tips:

- We have included some test signs for practice. Please follow the instructions to the right with the test signs before attempting application of your own signs.
- Signs can be cleaned with warm soapy water.
- Do not use metholated spirits or any other harsh cleaning agents.
- Vinyl signs can be removed but not reused.
